

# PORPHYROGRAPH QUICK START GUIDE

## WHAT YOU NEED

### REQUIRED

PC with Windows 7 or later system and a good graphic card

Internet connection

Installed: [pure data](#), [Supercollider](#), and [RENOISE](#)

### NOT ESSENTIAL BUT HELPFUL

USB controller

Drawing tablet

Webcam

Additional screen

Installed: [Strawberry Perl](#)

## WHAT TO DOWNLOAD

Download and uncompress the archive from

<https://github.com/yukao/Porphyrograph>

Open the folder Porphyrograph-master in which are located the downloaded files.

Copy the file interface/GlobalOscActions.lua

into /Program Files/Renoise-xxx/Resources/Scripts/GlobalOscActions.lua

## WHAT TO EXECUTE

Open with RENOISE: interface/LYM\_core\_RENOISE.xrns

Open with Supercollider: interface/LYM\_core\_Supercollider.scd

Open with pure data: interface/LYM\_core.pd. If you have a USB/midi controller, make sure to connect the controller through Media/MIDI settings.

Double click on PG-single.bat (single screen 1024x768),  
or PG-double.bat (double screen 2 times 1024x768),  
or PG-single-HD.bat (single screen HD 1920x1080)

ENJOY!
